

NITHEESH KUMAR REDDY MARAMREDDY

DATA CENTER OPERATIONS TECHNICIAN | SERVER VALIDATION | LINUX TROUBLESHOOTING

Memphis, TN | 901-335-9978 | nitheeshreddy980@gmail.com

Portfolio: [reddy0059.github.io/nitheesh-portfolio/](https://github.com/reddy0059/nitheesh-portfolio/)

PROFESSIONAL SUMMARY

Technical Operator with hands-on experience in rack-level and server-level testing, automated validation scripts, Linux terminal commands, MobaXterm, and internal server diagnostics. Investigates test failures, reviews diagnostic results, documents issues in Jira, and escalates findings to engineering teams. Background in software testing, production monitoring, SQL, and Python.

TECHNICAL SKILLS

Server & Rack Operations: Server-level and rack-level testing; power/network cabling verification; hardware diagnostics; system validation

Tools & Troubleshooting: MobaXterm; Linux terminal commands; internal server diagnostic applications; automated test script execution; log review; Jira

Systems & Testing: BIOS configuration; firmware updates; functional, performance, thermal and burn-in tests; test procedures; TPI/SOPs; technical documentation

Additional Technologies: SQL; Python; Microsoft Excel; Git; Ruby on Rails; HTML/CSS; JavaScript

PROFESSIONAL EXPERIENCE

Technical Operator | Hyve Solutions May 2026 - Present

- Execute server-level and rack-level testing using automated test scripts and internal server diagnostic applications to verify system behavior and test results.
- Investigate failed tests using Linux commands, terminal tools and MobaXterm; examine error information and diagnostic outputs to understand issues.
- Perform BIOS configuration and firmware updates, and verify rack power/network connections according to technical procedures.
- Record test failures, findings and observations in Jira; communicate unresolved or complex issues to engineering teams for further investigation.

Software Test Engineer | Hana Tech LLC Feb 2025 - Apr 2026

- Executed functional, regression, smoke, integration and user acceptance tests; reproduced defects and verified fixes with engineering teams.
- Used basic Linux commands and log reviews to investigate application and system issues; documented results and supported deployment validation.

Data Analyst | Microgate Technologies Pvt. Ltd. | India Feb 2020 - Jul 2022

- Monitored automated ETL workflows supporting 5M+ daily transactions; investigated processing failures using Python and SQL.
- Optimized SQL queries to improve performance by 40% and automated operational validation/reporting tasks.

SELECTED PROJECTS

Auction Web Application | Ruby on Rails, MVC, Git, HTML/CSS, pgAdmin 4

Built a web application from user stories and Balsamiq wireframes through MVC-based implementation and database administration.

Weather Web Application | HTML, CSS, JavaScript, Weather API

Created a responsive interface for location-based weather information, forecasts and temperature unit conversion.

EDUCATION

Master of Science in Computer Science | University of Memphis

Bachelor of Science in Computer Science | Sreenidhi Institute of Science and Technology
